Netley Marsh Steam and Craft Show 22nd, 23rd & 24th July 2022

The Netley Marsh Steam and Craft Fair turned out to be the biggest display of the year and showed a full range of our models. The weather was perfect for the 3 days although some would say a little too perfect.

Seven members of the group had models on display including our newest and youngest member in the sweltering heatwave that was to persist for a long time. Situated in the model tent with Model traction engines and the local Meccano society the number of visitors was a constant stream for all of the 3 days.

We were visited by the Caledonian Pipers who played a superb rendition of the "Highland Cathedral" to the delight of the whole tent. We were well looked after by our designated area marshal who did a sterling job and to whom we are grateful.

Members displaying were:

Dave and Andrea Reith, Richard Reith, Leo Reith, Ken Winter, John Wills, Charles Davis and David Mcnair Taylor

One highlight of the show was a visit by the Caledonian Pipers who came into the Marquee and played a wonderful rendition of "Highland Cathedral". Click on the video below to watch and hear the performance.
